ABSTRACT

The International Institute of Tropical Agriculture (IITA) is a non-profit research-development organization founded in 1967. We develop agricultural solutions with our partners to resolve hunger and poverty by increasing agricultural and productivity. The state of food security in Sub-Saharan Africa is a major concern, and the impact of climate change on food production is a growing concern. Therefore, the state of food security in Sub-Saharan Africa is a major concern, and the impact of climate change on food production is a growing concern.

Keywords: Agriculture, land use, climate change, food security.
